The material we use

Take It Outside!

Extira is a hardwood composite manufactured by CMI. CMI is a Chicago based manufacturer of CraftMaster Door Designs and finished doors, MiraTEC Exterior Composite Trim and Extira Panels. The company's state-of-the-art manufacturing facility in Towanda, PA., has a 38 year history of producing high quality building products for the commercial, industrial and residential markets.

The Gingerbread Man has done extensive research and testing to find the right material for our Decorative Exterior products (Gingerbread). Extira has consistently outperformed all other products. The support and assistance we receive from CMI is outstanding. They have proven to be a company that stands beside their customers to answer questions and find solutions to any and all issues.

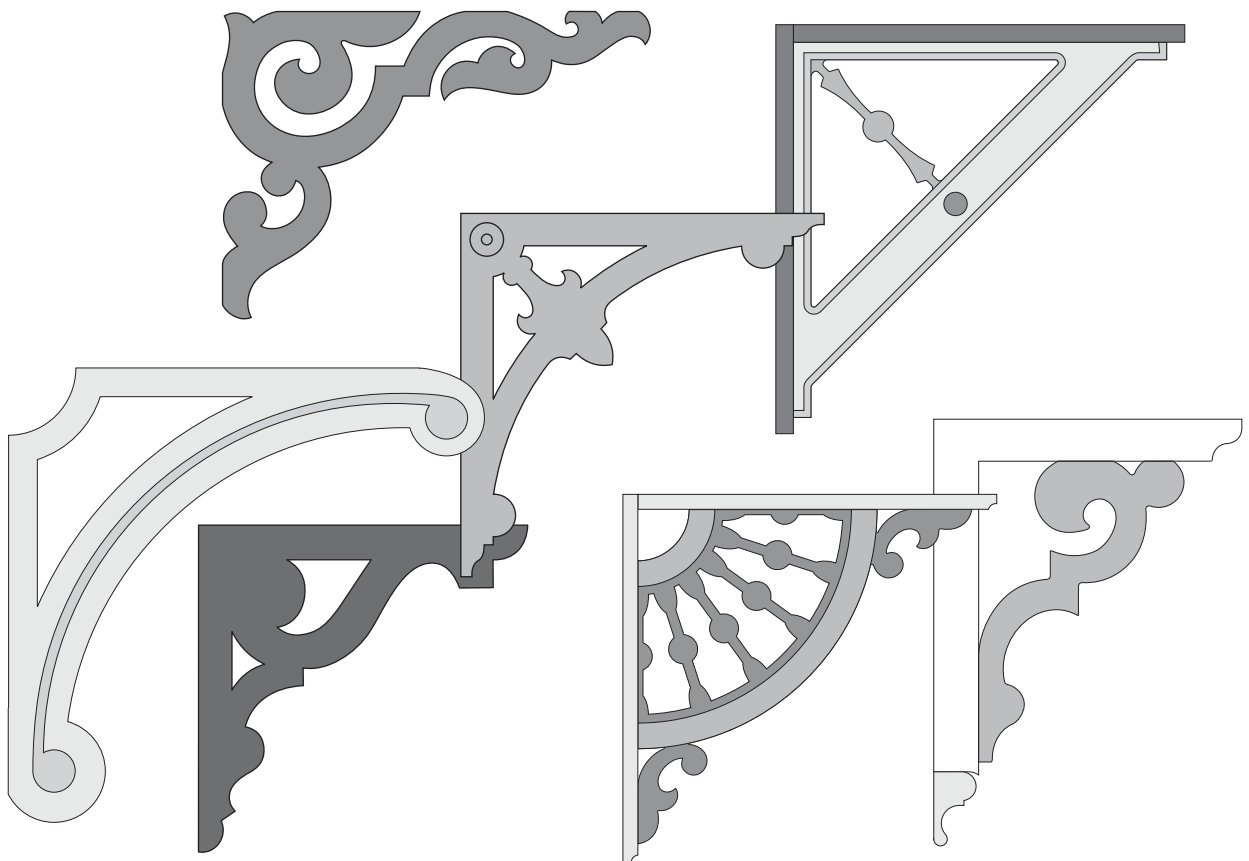

Corner Brackets Porch Post Brackets

Corner Brackets, Porch Post Brackets, Gingerbread Brackets...
Break up the "square" with some creativity.

A bracket with a straight side and top is a "framed style", when there is no fully flat line on the side and top it is "unframed". Some patterns have a wider piece of material on the sides, this we call a nailer or backer. Nailers can be added to any style bracket.

All Gingerbread comes unprimed and needs to be predrilled prior to installation. We include instructions in every shipment.

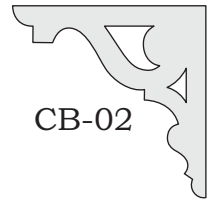

Corner Brackets Porch Post Brackets

Distinguished Gingerbread porch post brackets and corner brackets.

Our rapidly expanding Gingerbread collection of porch post brackets and corner brackets will have a style to fit everyone's taste. Because we are designing porch post brackets and creating corner brackets faster than we can post the new designs in a catalog, we encourage you to contact us if what you see here does not fit your desires perfectly.

CB-01 This is an "unframed" type of Victorian bracket. The cutout shape has no continuous flat line.

CB-02 is a great example of a "framed" bracket. Straight lines along the top and back.

Layered Corner Brackets Porch Post Brackets

A traditional look made The Gingerbread Man way.

Material and design for the New Painted Ladies.

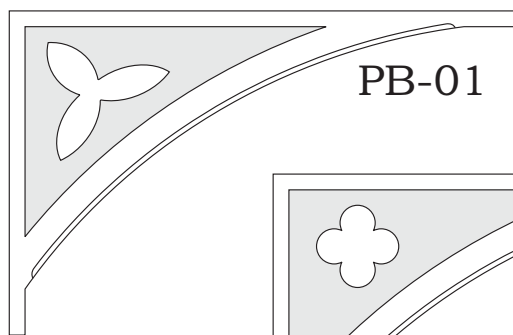

Layered brackets have a lot of dimension to them. The layers allow us to add details and elements to them that we cannot do with single layer brackets. The overall thickness of the pattern is 2 1/4" with the nailer being 2 1/2"

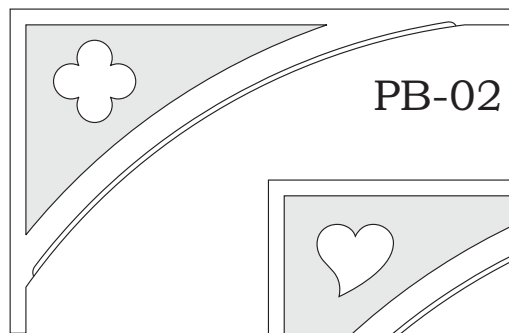

Pierced Style Porch Brackets

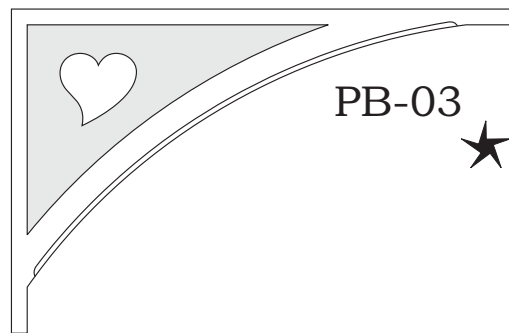

Pierced Panel Brackets are great for softening and opening or pass thru. The length can be added to for a continuous line. As you can see any pattern can be cut out of the panel area.

Eave Corbels Porch Corbels

These eave and porch corbels are made with layers for a nice beefy profile. Traditional and creative styles to choose from. If you don't see one that fits your style just send us a picture. We do custom work!

These corbels have less detail than our other layered corbels. They work well when they are used in a repeating pattern under the eaves.

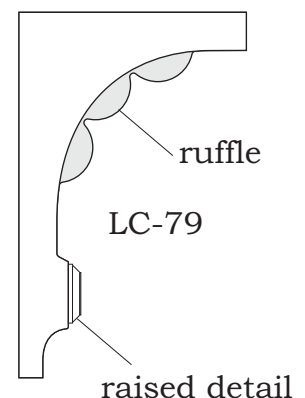

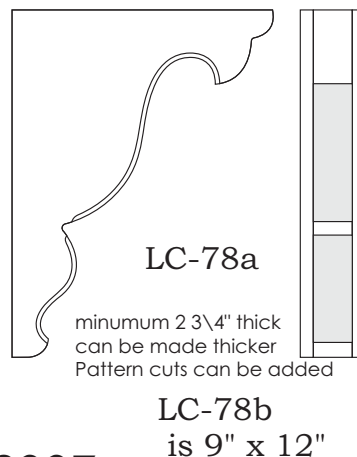

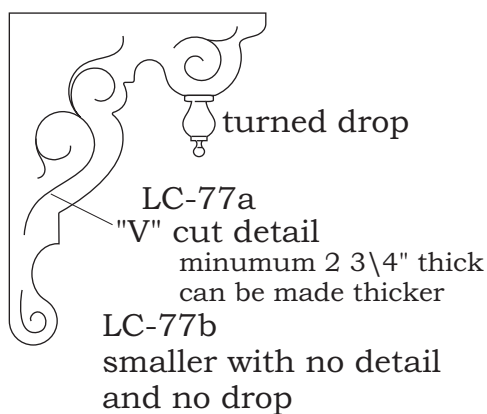

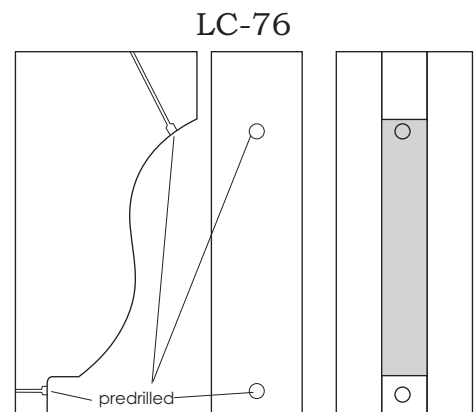

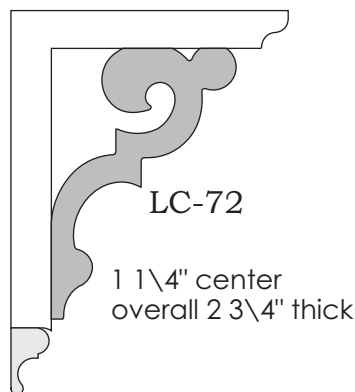

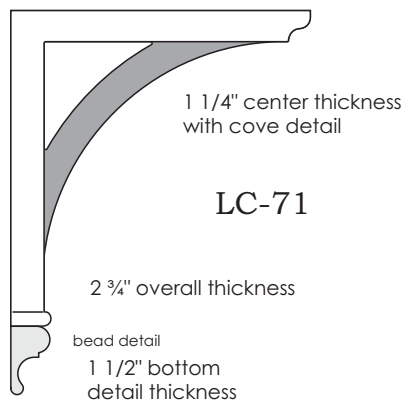

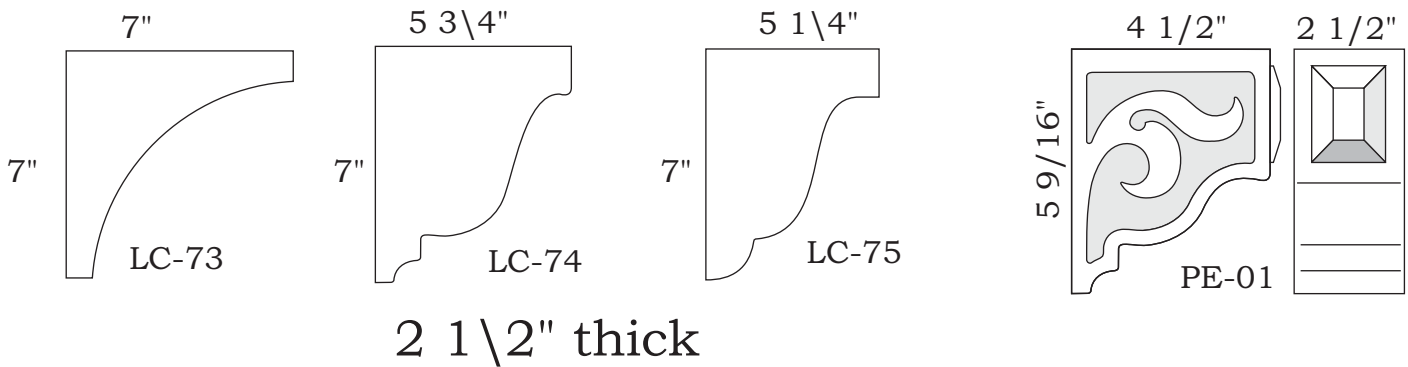

Eave Corbels Porch Corbels

continued

Dentil Corbels

These corbels are great for under eaves. Space them about 8-12" apart as a dentil moulding detail.

Porch Post Face Brackets

Porch Post Face Bracket. You would place these on the front side of your porch posts. They are longer than most brackets to reach farther down the post. These can also be scaled for window trim. This is one area we will be adding more to.

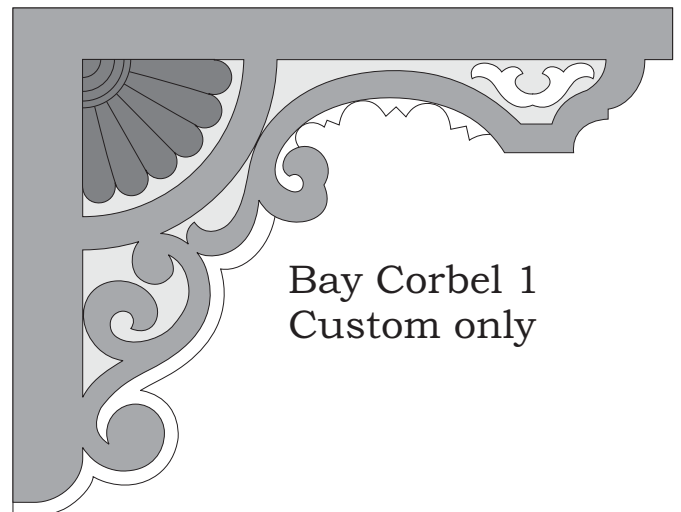

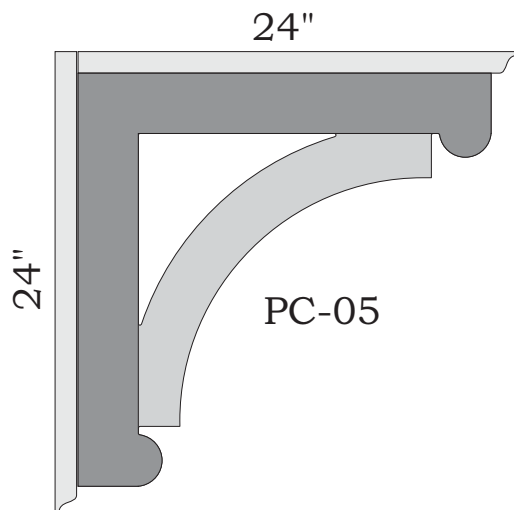

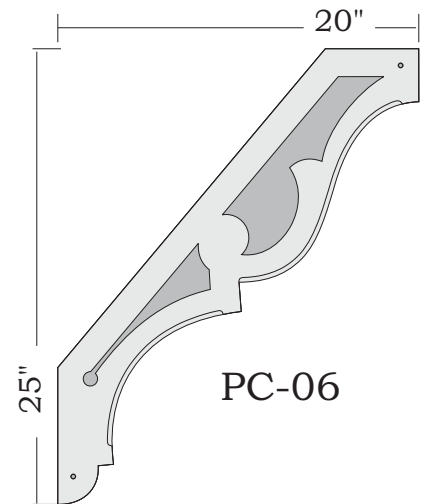

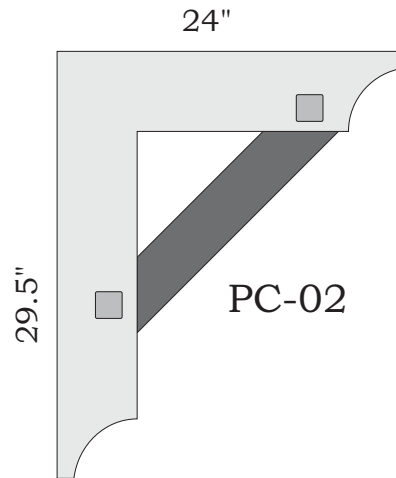

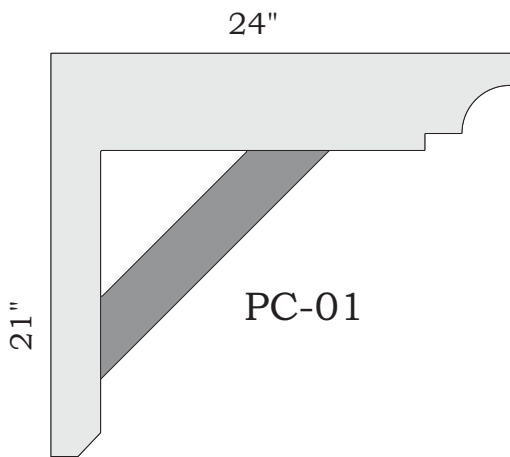

Large Porch and Eave Corbels

Large Porch and Eave Corbels

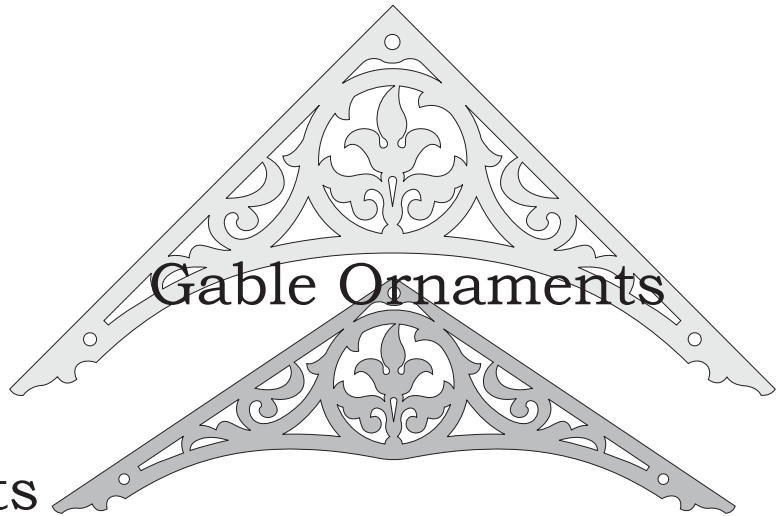

These large corbels work when the door entrance is separate from a porch with posts.

These are the big ones

Brackets that go together

Highly detailed Porch Face Brackets. Great for when the house is in a high visibility area. Recessed detail on the sides adds interest. Detail on the front is called a ruffle. These brackets are applied to the face of the porch post.

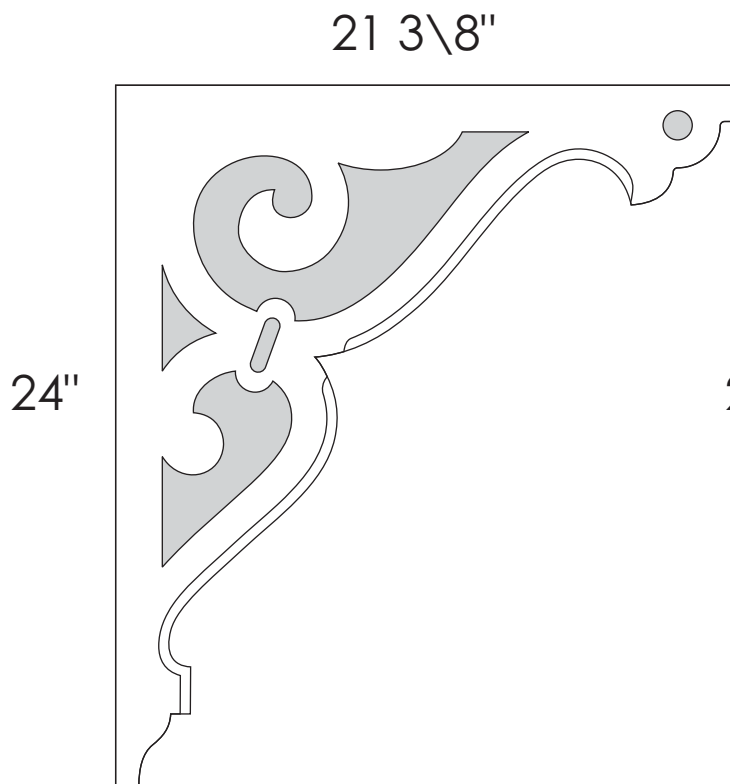

Can also be used for repeating cornice corbels. Roof pitch can be designed in and sizes can be modified.

Brackets that go together

LC-20

21 3/8" x 24" x 4" thick

PF-20

8 3/4" x 24" x 2 3/4" thick

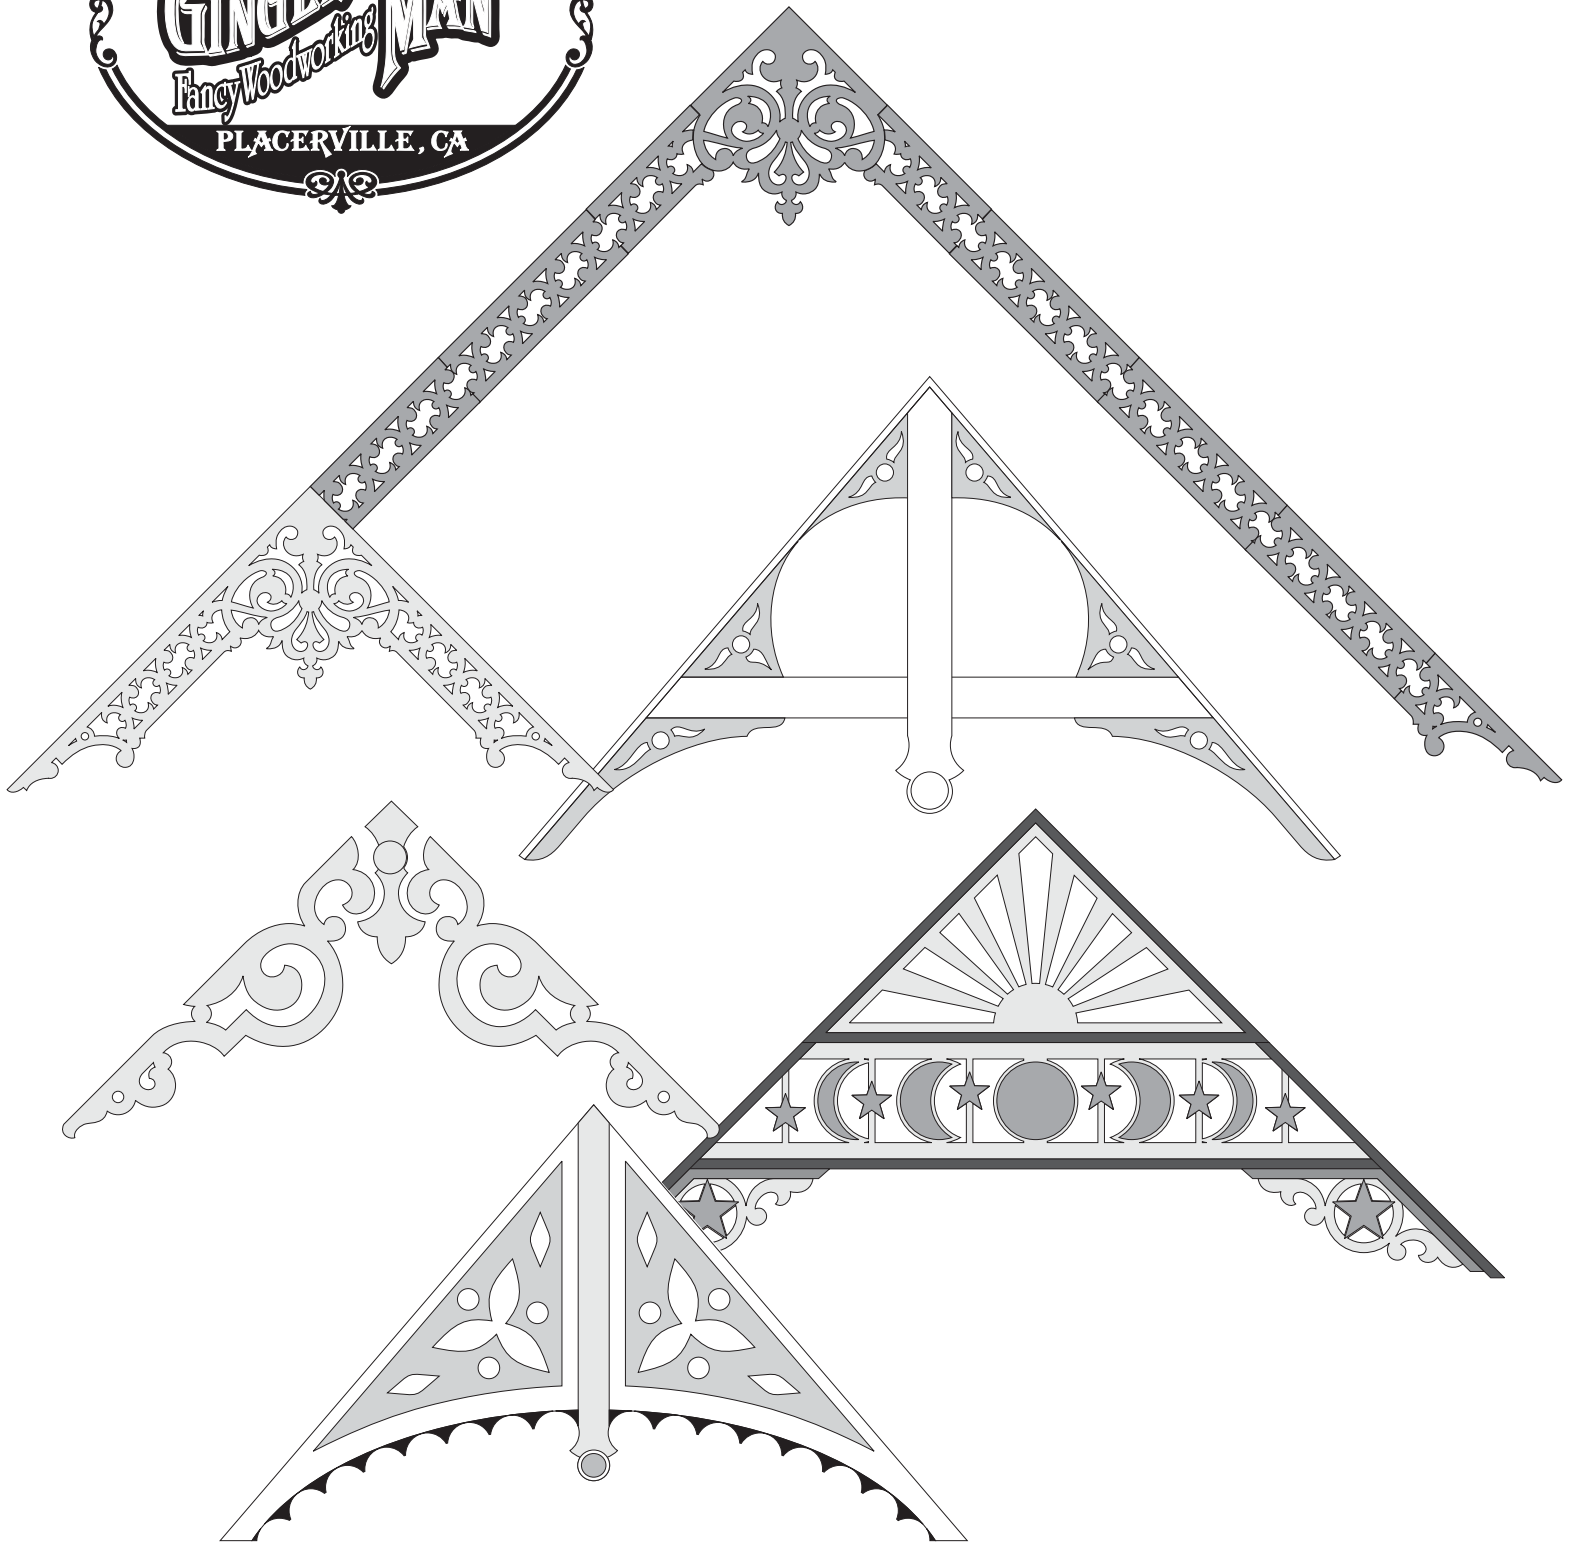

A very large eave corbel. The Porch post face bracket is designed to match.

Layered Corbels

For under eaves on corners or as a large porch corbel. Grey area indicates a relief detail. These can also be used as repeating under eave corbels

Gable Ornaments, Gable End Decorations, Dormer Decorations...

Gable ornaments can make the most dramatic change in the look of a home. The "AG-01 and 02" are considered adjustable. We make these in three pieces and the angle is trimmed in the field. We cut all other gable ornaments to the pitch given to us by our customer. To measure for a gable ornament you need to measure down each side from the peak 36" on each side. Make a mark. Measure between the marks. _____"

Measure carefully, pitches other than standard pitch are non-returnable. It is your responsibility for the correct pitch.

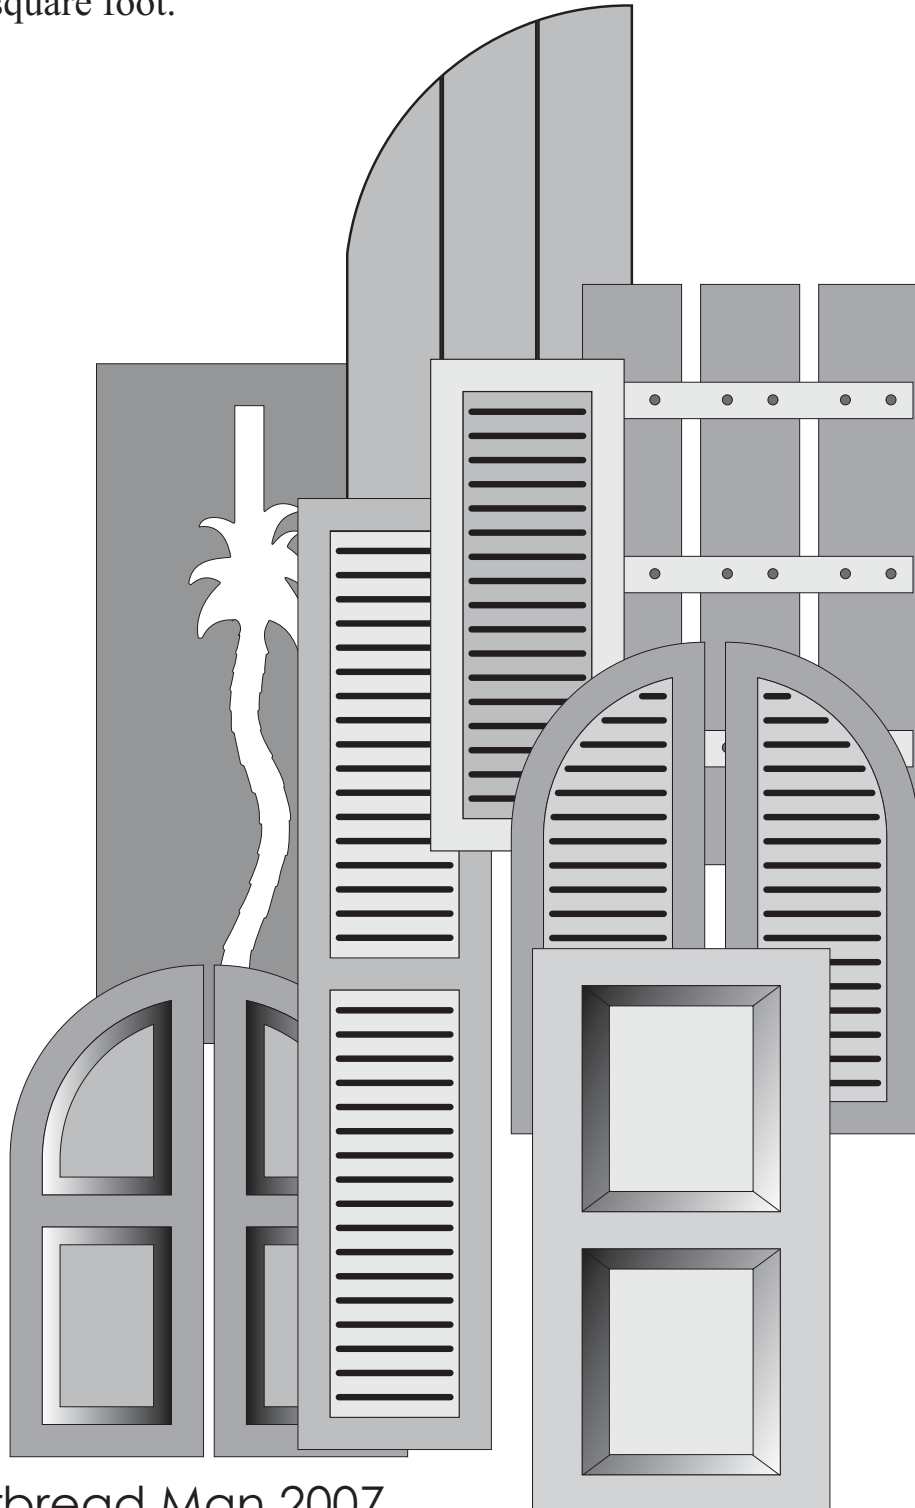

When gable ornaments are shipped they will be in 2 or more pieces. Some assembly in the field is required.

Shutters

Our Shutters are made with the same material and attention to detail as our Gingerbread. Here is the beauty of it; any pattern, any style, any size.....
Same price per square foot.

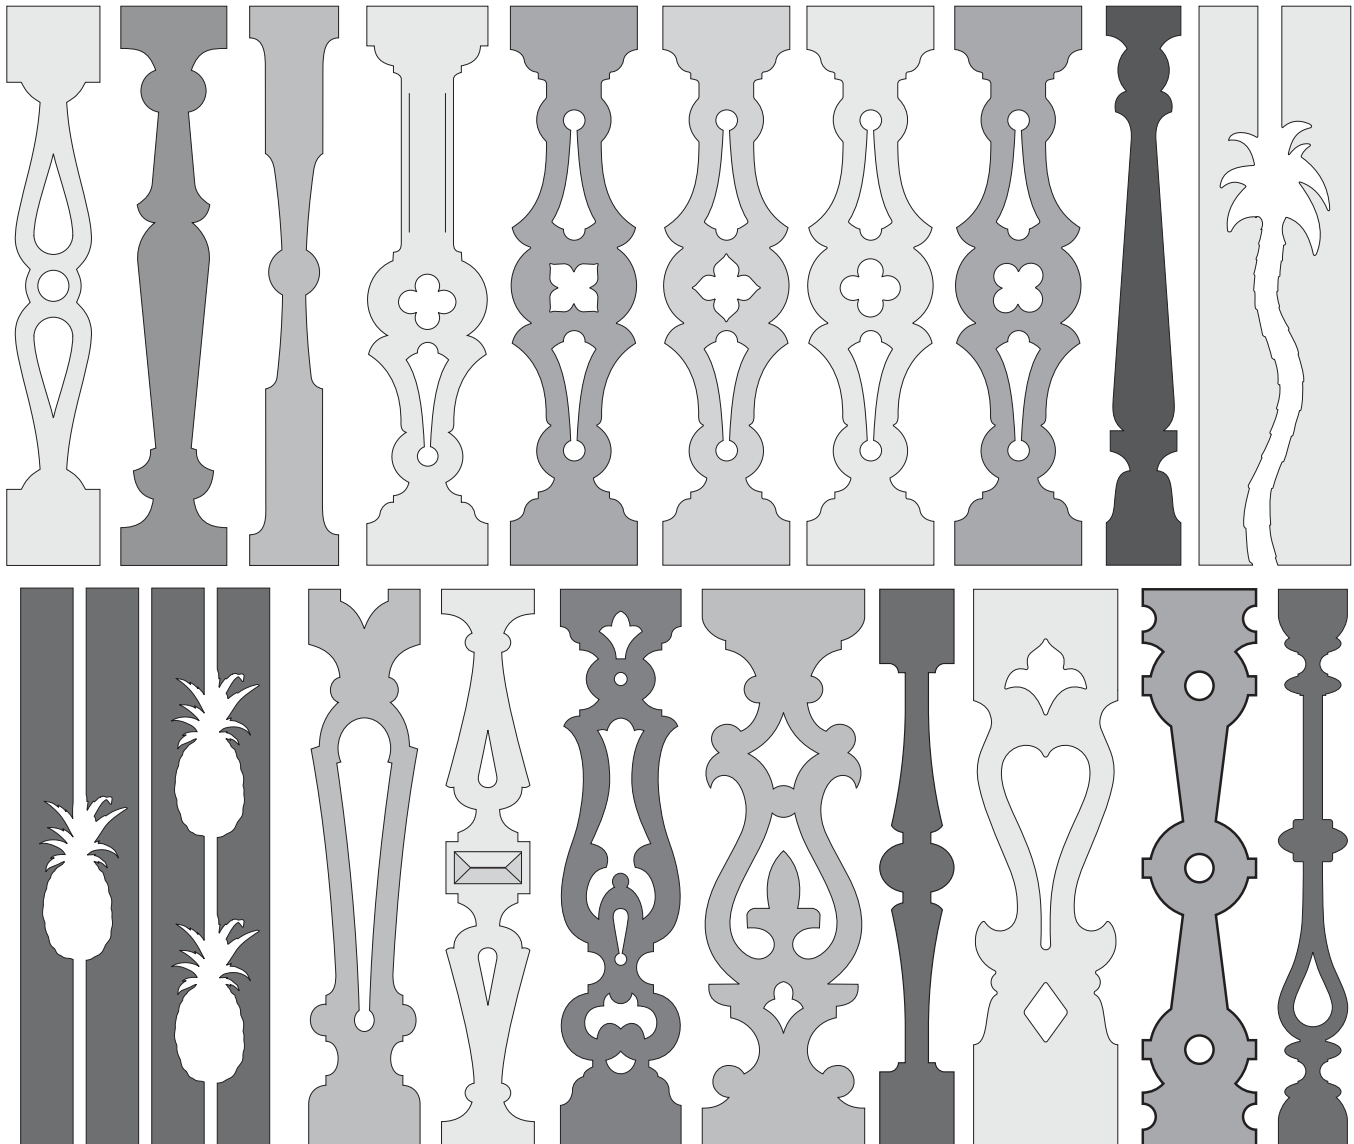

Sawn Balusters Railing Newell Posts Column Wraps

Sawn Balusters define the good old comfortable feel of a Home. From grandmas farm house to the Florida Keys, they wrap around porches and balconies. Our sawn baluster patterns span the late 1800's to contemporary design. Pick and choose and tell me what you want.

Patterns in the works include..... Tropical fish, a Chicken, Hearts and anything else my clumsy old hands can draw.

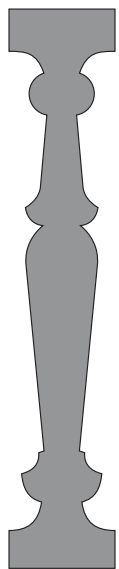

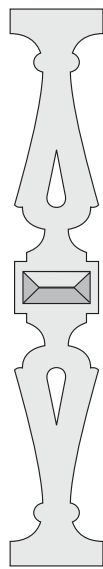

Sawn Balusters

We also custom design sawn balusters and create porch railing to fit your balustrade design.

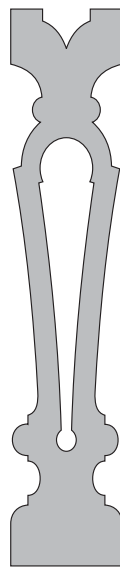

Contact us with the space measurements between your posts and we quote you for your interior or exterior sawn balusters. ALL our sawn balusters are 32" tall for "Straights" 42" tall for "Stairs".

Running Trim Spandrels

Running Trim, Barge Board Decoration, Spandrel...

We can do some incredible things with running trim. This is the frosting on the cake and usually determines the winner.

We have more patterns than we can show so you just have to ask if you don't see what you want.

This running trim hang between posts, along barge rafters, under gutters, have brackets below or brackets integrated into the design. Imagine.....
